75 Y.O.

- TAAA 65mm
- ATH
- PAD
OP-Plan

- Thoracic LP CMD
- 4X Fen. CMD
- AAA Bifurcated (ZFEN-D-12-28-76)
Patient Name: MORSTADT-KINDT C
Lot: AC1024957

Control Handle

Release Mechanism
- 1ˢᵗ Release Mechanism
  - Deploys Distal End
- 2ⁿᵈ Release Mechanism
  - Deployed Proximal End
- 3ʳᵈ Release Mechanism
  - Withdraws Diameter Reducing Wires

Sheath Type: FLEXOR sheath with captor valve
Length of Sheath: 75cm
ID: 20 FR
OD: 7.7mm

IFD: FEN/2
Deployment Sequence: RDCA PROV 07
Lessons learned TAAA and FEVAR

• Easy cases are not easy
• Difficult cases are even more difficult than they may appear
• Triple check the rotation
When in trouble in FEVAR

- Do not haste
- Check the new anatomy
- Steerable sheaths are very helpful
- You may manipulate the graft
- Snare kit is a must
- Do not forget the legs
  - Perfusion while manipulating
Thank you very much for your attention
Twist and Rock and Roll-should better be in a dancing place

Prof. J.S. Brunkwall, Dr. Wael Ahmad
